

## WESTERN RED CEDAR NO. 1 FOR WINDOWS & DOORS

Because of its stability, natural durability and its ready acceptance of stains and paints Western Red Cedar (bot: *Thuja Plicata*) remains the number one choice for windows.

Western Red Cedar's low density gives it exceptional insulating values—an important factor when considering energy ratings.

Tilling Timber's Western Red Cedar for windows comes from producers who have attained third party accreditation certifying that their products come from sustainably managed forests.

### NATURAL DURABILITY—ABOVE GROUND

Species	Class	Species	Class
Red Gum	1	Meranti (light red)	3
Western Red Cedar	2	Tasmanian Oak	3
Jarraah	2	Victorian Ash	3

### DURABILITY CLASS EXPLANATIONS

Class	Probable above ground life expectancy
1	Greater than 40
2	15 to 40
3	7 to 15
4	0 to 7

Reference document: AS 5604—2003.

**Western Red Cedar does not rely on a coat of paint for its durability. Competitively priced and consistent in quality, Western Red Cedar from Tilling Timber should be your No. 1 specification choice for windows.**
